

Discovery of STING allosteric activator targeting non-T cell inflamed tumor

Korea Institute of Science and Technology (KIST)

ONCOLOGY	Hit
Product Type	Small molecule
Indication	Cancer
Target	STING
MoA(Mechanism of Action)	Allosteric regulation of STING for boosting innate immunity
Competitiveness	Targeting non-T cell-inflamed tumors Activation of innate immunity in tumor microenvironment
Development Stage	Hit
Route of Administration	IV/PO
