

# Development of gene therapeutics targeting EYS-related Retinitis Pigmentosa

Sungkyunkwan University

OPHTHALMOLOGY	Hit
Product Type	Gene therapeutics
Indication	Retinitis Pigmentosa
Target	EYS related Retinitis Pigmentosa
MoA(Mechanism of Action)	Correcting disease relevant mutations in human EYS using prime editor
Competitiveness	Currently, there's no competing therapeutics ( <a href="https://www.clinicaltrials.gov">https://www.clinicaltrials.gov</a> )
Development Stage	Hit
Route of Administration	Subretinal injection
