

# Development of TEAD Interface3 Targeting Protein Degradator

Korea Research Institute of Chemical Technology

ONCOLOGY	Hit
Product Type	Targeted Protein Degradation
Indication	Colorectal cancer
Target	TEAD Interface3
MoA(Mechanism of Action)	Degradors binding to TEAD Interface 3 lead to protein degradation and disappearance of YAP/TEAD interaction
Competitiveness	First in class – Validation of efficacy for colorectal cancer and mesothelioma
Development Stage	Hit
Route of Administration	Enteral-Oral
