

Lead optimization for sarcopenia treatment NB-101 with NOTCH1 inhibitory mechanism

NB Science Co., Ltd.
NB SCIENCE

OTHERS	Candidate
Product Type	rProtein
Indication	Sarcopenia
Target	NOTCH1
MoA(Mechanism of Action)	Inhibition of NOTCH1 cleavage to promote muscle cell differentiation
Competitiveness	<ul style="list-style-type: none"> • No approved drug for sarcopenia to date. • NB-101 recombinant protein demonstrates a novel mechanism that promotes muscle differentiation through NOTCH1 signaling inhibition.
Development Stage	Candidate
Route of Administration	i.v. injection
